

CLEAN, DOMESTIC, AFFORDABLE

ALTERNATIVE FUELS

LOUISIANA CLEAN FUELS

56 Parishes

LCF Territory covers 56 parishes over 41, 675 SQ. MI.

$460 Million

Since 1993, The U.S. Dept. of Energy (DOE) Vehicle Technologies Office (VTO) has distributed close to $460 Million Transportation Project Awards.

78% Cleaner

Louisiana's VW Settlement funding will put an additional 117 Propane school buses on the road.

117 Buses

Contribute to a NOx reduction of approx. 140 tons over their lifetime. That's 78% cleaner than their diesel counterparts.

Clean Cities

2 : 1

Clean Cities coalition-supported projects have historically leveraged almost 2:1 in matching funds and in-kind contributions for private and public sector partners.

45,673 Tons

of GHG emissions reduced in one year.

263,169 LBS

Of NOx emissions reduced in one year.

Natural Gas

is currently the most used alternative fuel in Louisiana at 70% and is most commonly used in refuse, regional delivery, and transit fleets.

250 CNG refuse vehicles

1570 tons GHG reduced from refuse vehicles

250 lbs NOx reduced from refuse vehicles

CATS & SPORTRAN

Two LA transit fleets have electric transit buses in their fleets.

150% Increase

LCF Membership dues from the private sector for 2021 are up 150% over previous years and represents about 10% of our operating budget.

14 States

LCF is one of 14 states who are developing “Drive Electric” programs that will engage individuals, utilities, legislators, dealerships, and others towards removing adoption barriers and accelerating plug-in electric vehicle use in our states.

DRIVE ELECTRIC USA

DRIVE ELECTRIC LOUISIANA

20+ Hours

LCF conducted 20+ hours of Clean Fuel Education in 2020. 15 were virtual.

CERTIFIED GREEN FLEET

Launched statewide Green Fleets certification program.

For every electric transit bus that is purchased to replace a diesel, we will see a reduction of 90 tons of greenhouse gasses (GHG) and 385 lbs NOx a year.
