CLEAN, DOMESTIC, AFFORDABLE

Alternative Fuels

LOUISIANA CLEAN FUELS

Louisiana's VW Settlement funding will put an additional 117 Propane school buses on the road.

117

NOx 61% CLEANER

These buses will contribute to a NOx reduction of approximately 137 tons over their lifetime. That's 61% cleaner than their diesel counterparts.

NATURAL GAS

is currently the most used alternative fuel in Louisiana at 70% and is most commonly used in refuse, regional delivery, and transit fleets

262
CNG refuse vehicles

2,444
tons GHG reduced from refuse vehicles

64,584
lbs NOx reduced from refuse vehicles

Two LA transit fleets

CATS & SPORTRAN

have electric transit buses in their fleets.

For every electric transit bus that is purchased to replace a diesel, we will see a reduction of **57.5 tons of greenhouse gasses (GHG)** and **248 lbs NOx** a year.

Drive Electric Louisiana, a program of Louisiana Clean Fuels, is dedicated to accelerating EV adoption through outreach, education, and advocacy. Learn more at www.DriveElectricLA.org

DRIVE ELECTRIC LOUISIANA

Louisiana Clean Fuels is a US Department of Energy designated Clean Cities coalition and receives additional support from the Louisiana Department of Natural Resources and its stakeholders.
